Formed in 1997, TEPHENET (Training Programs in Epidemiology and Public Health Interventions Network) is a global network of field epidemiology training programs (FETPs) including those with laboratory components (FELTPs) and veterinary training components (FETPV). As of May 2019, TEPHENET comprises 71 official member programs. This document provides a brief overview of TEPHENET’s member programs. For more information, visit tephinet.org. Photo: Nathalia Munoz, FETP Colombia
TEPHINET was formed in 1997 in response to a need expressed by leaders of existing field epidemiology training programs (FETPs) around the world for a network through which FETPs across the globe could share knowledge and experiences.

At its founding, TEPHINET consisted of 10 programs. Today, 71 programs are members of TEPHINET.

What types of programs are TEPHINET members1?

- National, sub-regional and regional level field epidemiology training programs (FETPs) housed within ministries of health, public health agencies, universities, and other host institutions
- FETPs with laboratory training components (FELTPs)
- FETPs with veterinary training components (FETP-Vs)

Approximately half of TEPHINET’s member programs are degree-granting, while roughly one-third offer a medical specialty in field or applied epidemiology2.

**FETP prepares a strong workforce to battle disease outbreaks and other public health threats**

On average, FETP students (known as residents, trainees or fellows) spend 30 percent of their time in the classroom and 70 percent of their time in the field conducting general and event-based surveillance, outbreak investigations, scientific studies, and other applied activities. **Together, TEPHINET member programs have conducted more than 7,600 outbreak investigations and established or evaluated more than 3,000 surveillance systems3.**

---

1 In order to be classified as an official member of TEPHINET, a field epidemiology training program must submit a letter of interest and supporting documentation to the TEPHINET Advisory Board for review. Please contact secretariat@tephinet.org for more information.

TEPHINET Member Programs at a Glance

Below is a listing of our member programs by region. (TEPHINET follows the classification of the six geographic regions of the world as defined by the World Health Organization: Africa, Americas, Eastern Mediterranean, Europe, Southeast Asia, and the Western Pacific)

Other Field Epidemiology Training Programs

The following programs are not members of TEPHINET but collaborate with us to implement projects and provide opportunities to their trainees and graduates.

- Bangladesh Field Epidemiology Training Program
- Caribbean Regional Field Epidemiology and Laboratory Training Program
- Democratic Republic of the Congo Field Epidemiology and Laboratory Training Program
- Ecuador Field Epidemiology Training Program
- Gambia Field Epidemiology Training Program
- Liberia Field Epidemiology Training Program
- Malawi Field Epidemiology Training Program
- Mauritania Field Epidemiology Training Program
- Mediterranean Program for Intervention Epidemiology Training
- Myanmar Field Epidemiology Training Program
- Sierra Leone Field Epidemiology Training Program
- South Sudan Field Epidemiology Training Program
- Tunisia Field Epidemiology Training Program
- Ukraine Field Epidemiology Training Program
- Uruguay Field Epidemiology Training Program

For more detailed information on our member programs, please visit www.tephinet.org or contact secretariat@tephinet.org.
