Affected states: 6
Trend in the percentage of routine immunization expenditures financed by governments, 2000-08

Partnering for Innovative Financing Initiatives

- IDA Buy-down projects in Nigeria and Pakistan for polio eradication
- SVI Sustainable Immunization Financing Program
- Peru’s Results-based Budgeting by Ministry of Health and Ministry of Economy & Finance for new vaccine introduction
AFRO’s Partnership Initiative

- SVI Sustainable Immunization Financing Program advocacy strategies (parliamentary briefings) have led to new legislative proposals to establish national immunization trust funds
  - DR Congo
  - Cameroon
  - Mali
  - Senegal
  - Sierra Leone
  - Kenya
Change in Annual Budget for Vaccines and Syringes, Peru, 2000-11 (in US$)

- **Results based budgeting**: Partnership between MOH and MOF for introduction of new vaccines

- **Approach initiated in 2009**: intended to improve budget estimates and allocation process to apply cost structures for each child with completed vaccination schedule appropriate by age.

- **Human resources, operational, and cold chain needs** were identified for introducing pneumo, rota and other new vaccines. Emphasis placed on evaluating use of public funds by results.

- **Risks**: not achieving the results; accuracy of the data; capacity at regional & district levels to implement; sustaining political commitment for the initiative.
